

Testing both contacts together

The tested correction did not achieve both contacts

Target and measured points

Zoom into the measured responses

- ★ EXP-497/501 anchor
- ◇ a half step
- c half step
- ◆ a full step
- c full step
- ✚ Measured joint proposal

Means and complete ranges of 256 correlated representations; ranges are not confidence intervals.

The coordinate target is necessary, not sufficient: full-state, primitive-period and representation checks still apply.

No fitted curves. Full and half steps refer to the frozen a,c increments.
