

Where a section intersection is born or lost

15/16 nominated intervals qualify | both solvers and all prescribed side arms retained

Fixed $b=0.2$, $c=7.212$; varying initial conditions, not parameters. Ten screened-regular intervals were not selected.

● DOP853 filled
 ○ Radau outline
 ● Accepted negative crossing
 ■ Other crossing
 ◆ Located tangency
 --- Local quadratic prediction (not a fit)
 × Failed side arm retained
