

Following the corrected periodic orbits

EXP-494 | 54/64 new nodes qualify; 56/64 attempted | all eight arms retained

Base pairs: 2/2 qualify. $b = 0.2$ throughout. No symbolic letters are assigned.

Every planned parameter node: DOP853 / Radau projected winding

Period panels include only corrected candidates passing their correction gate; the grid retains every failed/unrun node.

Numbers are projected winding, not C/D words. Counts may change between nodes; no interpolated connection is claimed.

A stopped arm does not establish absence of a periodic family. Numerical minimal-period checks are conditional, not proofs.
